Address: Thu Duc, TP.HCM

OBJECTIVE

As a motivated and creative IT student and full-stack developer, I enjoy transforming ideas into useful products that solve real-world problems. I am confident working with the *MERN Stack*, with a primary focus on database optimization (*Prisma/MongoDB*) and system security (*JWT/Bcrypt*). Having completed two comprehensive projects, I believe I would thrive even more working in a professional environment with clear processes and learning from experienced colleagues. Therefore, I am eager to join your company as an intern to work diligently, create significant value, and sustainably improve myself.

EDUCATION

Sep 2023 - Sep 2027 **UTH - University of Transport Ho Chi Minh City**
Major: Information Technology
GPA: 3.35/4.0

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3
FE Frameworks	React.js, Next.js (App Router), TailwindCSS
Backend	Node.js (Express.js), RESTful API development
Database	PostgreSQL (Prisma ORM), MongoDB (Mongoose), MySQL
DevOps & Tools	Docker, Git/GitHub, Linux (Debian), Postman, Vercel, Render, Supabase

OTHER SKILLS

Soft Skills	Communication, Problem-solving & Debugging, Adaptability, Teamwork, Time Management
AI Tools	Github Copilot, Cursor, Claude CLI, Codex
English	Reading technical documentation, Communicating in technical discussions, Writing documentation and reports

INTERESTS

Walking (come up with new ideas), Playing Strategy Games (enhancing logical reasoning & teamwork skills), Listening To Music (This is how to activate deep focus mode), Reading Science Books (expanding technical & life knowledge).

PROJECTS

03/2025 - 06/2025 **SPACEZONE - SOCIAL MEDIA WITH REAL-TIME CHAT**
FullStack Developer
A full-stack social media web application with real-time messaging, user authentication, and

interactive features such as posts, comments, friend connections and profile customization.

Responsibilities

- Built responsive and user-friendly interfaces using *ReactJS* and *TailwindCSS*.
- Designed and developed RESTful APIs using Node.js and Express.js for user, post, and messaging services.
- Implemented secure user authentication and authorization using *JWT*.
- Implemented real-time messaging using Socket.IO for instant user communication.
- Designed *MongoDB* schema and implemented efficient data models for users, posts, friendships, messaging features and profile data.
- Designed and implemented social interaction features (likes, comments, connections), improving user engagement and system interaction flow.
- Integrated frontend with backend APIs, ensuring smooth data flow, validation, and error handling.
- Deployed and maintained full-stack application using GitHub Pages (frontend) and *Render* (backend).
- Managed source code and version control using *Git* and *GitHub*.

Technologies

- Frontend: ReactJS, TailwindCSS
- Backend: Node.js, Express.js, Socket.IO
- Database: MongoDB
- Deployment: Github Pages, Render
- Tools: Git/GitHub, VSCode, Postman

07/2025 - 10/2025

LIGHTBRAVE.EDU - STUDENT MANAGEMENT WITH QR CODE

FullStack Developer

A web-based student management system with QR code attendance tracking and role-based access control for teachers and students.

Responsibilities

- Designed and developed scalable backend services using Node.js, Express.js, and TypeScript, exposing RESTful APIs for business logic and data processing.
- Designed relational database schema using PostgreSQL and Prisma ORM, handling complex data relationships.
- Implemented secure authentication (JWT) and role-based access control (RBAC) for user authorization.
- Applied backend security practices including password hashing and request validation.
- Developed frontend features using *Next.js (App Router), TypeScript* and built responsive interfaces with TailwindCSS.
- Developed QR code-based attendance system to automate student check-in process.
- Managed source code and version control using *Git* and *GitHub*.

Technologies

- Frontend: NextJS, TailwindCSS, TypeScript
- Backend: Node.js (Express.js), TypeScript
- Database: PostgreSQL
- Deployment: Vercel, Render
- Tools: Git/GitHub, VSCode, Postman
